To the Army Dental Corps

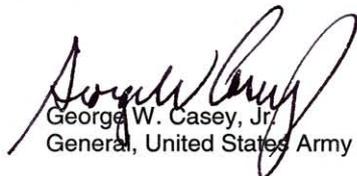

Congratulations and best wishes to the members of the Army Dental Corps on the occasion of the Centennial Anniversary of your service and contributions to the Army and the medical profession. Your efforts have contributed greatly to the readiness of our Army Soldiers and their Families.

Through visionary leadership and a compassion for our Soldiers and their Families, the Dental Corps community has demonstrated a dedicated commitment to care that is in keeping with our Army values. In addition to the day-to-day care, your contributions to Army medicine have resulted in quality care in Afghanistan, Iraq and elsewhere. From the earliest days of formal establishment of the Dental Corps, the Army has always recognized the dental readiness of the fighting force as an important element of the overall health, fitness, and readiness of the Army, and the Army Dental Corps has always answered the call.

I encourage all of you to take pride in your history of excellence—and challenge yourself to make even greater contributions in your next century of service. You are a tribute to the professionalism of our Army—a strength that comes from our values, our ethos, and our people.

Thank you for leading the way.

Army Strong!

George W. Casey, Jr.
General, United States Army
